Professional Summary

DevOps Engineer with 6+ years of experience designing, automating, and managing cloud-native infrastructure and CI/CD pipelines. Expertise in AWS, Terraform, Blue-Green deployment strategy, and Node.js application deployments. Proven experience migrating on-premise infrastructure to AWS, improving scalability, reliability, and deployment efficiency.

Technical Skills

AWS EC2 | AWS S3 | AWS RDS | AWS Lambda | AWS VPC | Terraform | Node.js | Express.js | Docker | Kubernetes
Jenkins | GitHub Actions | CI/CD | Linux | Shell Scripting | Blue-Green Deployment | On-Prem to Cloud Migration

Professional Experience

DevOps Engineer – Fannie **2021 – Present**

- Designed and implemented CI/CD pipelines for Node.js microservices using Jenkins and GitHub Actions.
- Automated AWS infrastructure provisioning using Terraform for EC2, RDS, S3, IAM, VPC, ALB.
- Implemented Blue-Green deployment strategy using AWS Application Load Balancer to achieve zero-downtime releases.
- Migrated legacy on-premise applications to AWS cloud infrastructure.
- Containerized applications using Docker and deployed to Kubernetes clusters.
- Reduced deployment time by 35% through automation and pipeline optimization.
- Improved production availability to 99.9% via CloudWatch monitoring and alerts.

Cloud & DevOps Engineer – HP **2019 – 2021**

- Supported enterprise Node.js applications in hybrid and AWS environments.
- Built reusable Terraform modules to standardize infrastructure provisioning.
- Managed AWS services including EC2, Auto Scaling, ALB, and S3.
- Participated in on-prem to cloud migration initiatives.
- Implemented CI/CD pipelines with automated testing and security validation.
- Reduced infrastructure costs by 20% and improved system reliability.

Key Projects

On-Prem to AWS Cloud Migration

- Containerized applications using Docker and deployed on AWS.
- Provisioned infrastructure using Terraform for EC2, RDS, S3, VPC.
- Implemented CI/CD pipelines for automated deployments post-migration.
- Reduced costs by 25% and improved scalability with Auto Scaling Groups.

Blue-Green Deployment Implementation

- Maintained parallel production environments (Blue & Green).
- Deployed new releases to inactive environment and switched traffic via ALB.
- Enabled instant rollback to previous stable environment for zero-downtime releases.

Education

Bachelor's Degree in Computer Science – University Name – Year

Certifications

- AWS Certified Solutions Architect – Associate
- HashiCorp Certified: Terraform Associate
